PSA GWADAR INTERNATIONAL TERMINALS LIMITED

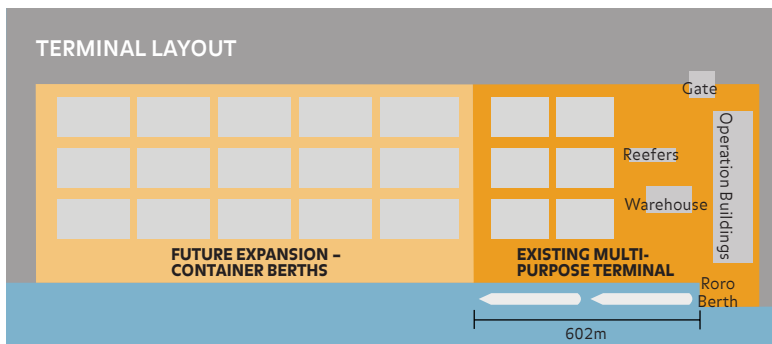

Gwadar, on the southwestern coast of Pakistan, is well located to serve the burgeoning national economy and is slated to be an important gateway to the Central Asia region. It is connected to the hinterlands in Pakistan and the Central Asia region via a network of roads and highways.

PSA Gwadar International Terminals is situated in the western province of Balochistan, just outside the Straits of Hormuz and near the key shipping routes passing through the Persian Gulf. It is an emerging transshipment hub for the Gulf Region as well as for the Europe and Far East service routes. It is capable of handling both conventional and containerised cargo, and its 14.5 metres depth alongside is the deepest among all the berths in Pakistan. ■
